

| Mario Kalogjera | Bojan Kotzmuth | Ivan Ratković | Lado Skorin — projekt *project* **reLocated** — 2005. — opis projekta *project description* --- Okoliši izgrađeni vremenskim krivuljama, pulsiranjima vlastitih aktivnosti, vektorima sila, fluidnim tokovima utjecaja, promjenjivim uvjetima i spiralama značenja stvaraju timesites (vremenska mjesta), naseljive lokacije određene trenutkom i okolnostima. Dinamični tereni kontinuirano se uspostavljaju kroz nove adekvatne geometrije. Novonastala polja i zatvoreni prostori s pripadajućim gravitacijama privlače aktivnosti i korisnike da pridonesu njenim stalnim promjenama. Oni predstavljaju pojačana prostorna stanja spremna da budu naseljena i nadopunjena u svojoj kompleksnosti. Pozicije, definicije koordinata, područja, trajanja, intenziteti i odnosi izmjenjuju se u stvaranju prostornih ograničenja i poticaja. Prisutni sada i ovdje, omogućuju izmještanje. — *Environments developed with temporal curves, with the pulsations of their own activities, vectors of force, fluid flows of influence, changeable conditions and spirals create timesites, inhabitable locations determined by moment and circumstances. Dynamic terrains are constantly set up through a new appropriate geometry. The nascent fields and closed spaces with their appertaining gravities draw activities and users to contribute to its constant changes. They represent enhanced states of spatiality ready to be inhabited and supplemented in their complexity. Positions, definition of coordinates, areas, durations, intensities and relationships are modified in the creation of spatial constraints and inducements. Present here and now, they facilitate relocation.*
