

■ autor *author* **DALIBOR MARTINIS** ■ suradnik *collaborator* Neven Kovačić ■ projekt *project* March Online ■ 2006. ■ opis projekta *project description* --- www.marchonline.org platforma je za virtualne demonstracije. www.marchonline.org virtualno je mjesto za izražavanje istinitoga političkog stava. Prema Badiouu svaka pojedinačna istina ima svoje ishodište u događaju. Događaj je smješten unutar neke situacije. Iz mjesta događaja kreće radikalna promjena. Svaka akcija koja radikalno mijenja stvari ima pak svoje ishodište u jednoj točki. Prvu točku u prostoru marchonlinea postavlja pojedinac definirajući i pozicionirajući sebe kao inicijatora marša. Oko te će se točke, ili se neće, formirati politička objava kao istinit događaj. www.marchonline.org jest web portal na kojem svaki pojedinac može inicirati nove ili se uključiti u već postojeće virtualne demonstracije. Demonstracije tj. marševi nastaju spontano ili organizirano, ali ih uvijek mora pokrenuti netko od korisnika. Može ih inicirati stav ili reakcija na neki aktualni lokalni ili globalni problem, mogu biti izraz političke volje, mogu podupirati nešto ili protestirati protiv nečega, mogu biti slavljenje ili pobuna. Moguće je istodobno imati pro et contra demonstracije. www.marchonline.org ne izražava svoju ideološku poziciju unutar zadane situacije nego se nudi kao prostor organiziranja javnosti u kojem tu poziciju zauzimaju korisnici. www.marchonline.org ■ www.marchonline.org is a platform for virtual demonstrations www.marchonline.org is a virtual site for the expression of a truthful political viewpoint. According to Badiou, an individual truth has to have its origin in an event. An event is located inside some situation. From the site of the event, radical change is generated. Every campaign or action that radically changes things has its originating point at a single point. The first point in the space of marchonline is placed there by the individual, defining and positioning himself or herself as the initiator of the march. Around this point, a political proclamation will be formed – or not – as genuine event. www.marchonline.org is a Web portal in which every individual can start off new or get involved in already existing demonstrations. Demonstrations, or marches, are created either spontaneously or through some organization, but they always have to be started off by one of the users. He or she can initiate a viewpoint or a reaction to some local or global problem, the viewpoints can be the expression of political will, they can support something or protest against something, they can be a celebration or a revolt. It is possible to have pro and contra demonstrations for the same thing at the same time. www.marchonline.org does not express its own ideological position within this situation, only provides itself as a space for the organization of the public in which the users have this position.
